SIAST CSI investigations focus on careers

SIAST invites high school students to explore post-secondary options

February 12, 2008 – SIAST is inviting high school students to a series of CSI events – Come. See. Investigate – across the province during February, March and April.

"Our CSI events allow Grade 11 and 12 high school students to come to the campus, interact with the instructors and talk to students in the programs," says Bill Blok, recruitment coordinator. "The CSI events let students get up close with our programs, learning more about them and potential career opportunities."

SIAST's CSI events often include a hands-on component in a lab, shop or simulation room, in addition to an orientation session and campus tour.

Blok adds, "Many of the students get a real eye opener when they explore our training facilities. Because of our great relationship with industry, our students learn on top-notch equipment. Depending on their choice for CSI, they may get a chance to check out a new Pontiac Solstice or conduct an experiment in one of our labs."

Students interested in the CSI tours can learn more by visiting New@SIAST at www.goSIAST.com. Applicants can register online a minimum of five working days in advance of the CSI tours.

SIAST is Saskatchewan's primary public institution for post-secondary technical education and skills training, recognized nationally and internationally for its expertise and innovation. Almost 12,000 students are registered in SIAST programs, which touch every sector of the economy; additionally, the organization draws more than 29,000 individual course registrations. It operates campuses in Moose Jaw, Prince Albert, Regina and Saskatoon, and provides a number of courses and programs through distance education.
